

DANTE

ACCESS CONTROL

Protect your Business, Employees and Visitors

You need to protect your premises and assets but you do not want to hamper the free movement of authorised staff and visitors to your site. Our Access Control Systems can determine and record who goes where and when.

Systems can be used for payroll time keeping, fire alarm role calls including finding the last known location of anybody not reporting and even instigate an automatic search through an integrated CCTV system.

Whether its a single door intercom system on your office door or a site with hundreds of doors, our comprehensive range of equipment will meet with your requirements. All of our Access Control

Systems are designed and installed to comply with EN50133 regulations.

Have you considered leasing? All electronic fire and security systems provided by Dante can be purchased or leased over a period to suit your needs where capital expenditure is not a feasible option.
