

# DANTE INTRUDER

**Intruder alarms designed for your peace of mind**

**As an SSAIB accredited firm we are able to design, install and maintain your effective intruder system. The ongoing management of false or unwanted alarms is all part of the requirement of an intruder system with Police Response and our remote and on-site maintenance procedures ensure this is carried out.**

As with most of our electronic systems, rapidly deployed radio systems are available and can be useful for such applications as building sites and events. They can be integrated with CCTV and 24hr remote monitored for confirmation of intruders by our Alarm Response Centre ARC.

We can also install the Police led SMART WATER INDEX SYSTEM, which uses state of the art forensic science to tie an intruder to a crime.

All our intruder alarms are designed and installed to comply with EN50131 and supplemented by DD243 and PD66662 regulations.

Have you considered leasing? All electronic fire and security systems provided by Dante can be purchased or leased over a period to suit your needs where capital expenditure is not a feasible option.
