

# **DANTE** **CCTVSYSTEMS**

**Solutions for your security needs**

**From full function site wide and multiple site systems with secure web interface for viewing from anywhere in the world, to a short term rental camera system in a stock room to resolve a particular issue, Dante can provide a full service to suit your requirements.**

We carry a full range of cameras, lenses, image and sound recording systems, many sourced direct from the manufacturer to keep the costs down. Systems may be integrated with fire detection, access control and intruder systems to trigger automatic recording, alarm and screen flash.

We can provide short or long rapid deployment wired or radio based CCTV systems for events and time-lapse recording of building projects for example which can be linked directly into a web site. All our CCTV systems are designed and installed to comply with the NCP 104 Code of Practice for CCTV systems.

Have you considered leasing? All electronic fire and security systems provided by Dante can be purchased or leased over a period to suit your needs where capital expenditure is not a feasible option.
