

# DANTE

# FIRESTOPPING

**We at Dante Group offer unparalleled third party accredited passive fire solutions. All works are carried out by our fully trained engineers and are delivered on time and within budget whilst maintaining the highest possible standards. No matter what your passive fire protection needs are, we have you covered.**

## Our Services

- Fire Door and Compartmentation Surveys
- Fire Door Remediation and Installation
- Fire Stopping Compartmentation, Remediation and Installation
- Pre-Planned Maintenance Visits
- Fire Damper Survey's and remedial works

**Fire Doors:** Fire Doors form part of a buildings passive fire protection and should be surveyed every 6 months. These surveys should only be carried out by a fully competent, trained and qualified engineer and all our engineers are FDIS certificated

**Fire Door Remediation:** Following on from the initial visit. Dante will issue you with a full report and highlight any recommendations from the survey. We can also carry out any remedial works that may be required whether that be slight alterations or installing new doorsets.

**Fire Stopping:** The sealing of any openings in walls, floors or joints to prevent fire/smoke passing through multiple building compartments. This is achieved by using approved tested products. Such examples of these products are Fire Batt, Intumescent Mastic, Pipe Collars, Wraps and Fire Curtain.

**Fire Dampers:** Fire Damper surveys are the initial step in achieving fire damper compliance. The survey will identify all fire dampers in your building, and If a damper is found to be inoperable, Dante Group can discuss your options for repair or replacement. We have necessary experience to ensure the integrity of the fire protection in and around the fire damper is maintained.
